Introduction

The comprehensive Indiana School Improvement Plan aligns the improvement requirements for schools under Title I, PL221, and the Student Achievement Plan (SAP) for focus and priority schools.
Executive Summary
Introduction

Every school has its own story to tell. The context in which teaching and learning takes place influences the processes and procedures by which the school makes decisions around curriculum, instruction, and assessment. The context also impacts the way a school stays faithful to its vision. Many factors contribute to the overall narrative such as an identification of stakeholders, a description of stakeholder engagement, the trends and issues affecting the school, and the kinds of programs and services that a school implements to support student learning.

The purpose of the Executive Summary (ES) is to provide a school with an opportunity to describe in narrative form the strengths and challenges it encounters. By doing so, the public and members of the school community will have a more complete picture of how the school perceives itself and the process of self-reflection for continuous improvement. This summary is structured for the school to reflect on how it provides teaching and learning on a day to day basis.
Description of the School

Describe the school's size, community/communities, location, and changes it has experienced in the last three years. Include demographic information about the students, staff, and community at large. What unique features and challenges are associated with the community/communities the school serves?

SCHOOL NARRATIVE

Beiriger Elementary School is one of four elementary schools, three public and one parochial, in Griffith, Indiana, a town of seven square miles and a population of 17,500. This small stable, urban community is basically comprised of blue-collar workers and depends heavily on the various steel mills and related industries located in the region for employment opportunities. The Griffith community is very supportive of its schools. The Education Foundation supports unique teaching/learning opportunities for students and school staff. Since its inception in 1985, over $325,000 have been released to provide these opportunities to the Griffith Public Schools. Community-based corporate sponsorship by Pepsi, Target, Office Depot, and Meijer Superstores are examples of continuing community support. Partnerships with Indiana University Northwest, Purdue University Calumet, and Calumet College of St. Josephs allow field experiences for aspiring teachers. Senior students from Griffith High School participate in the Cadet Teaching Program, which provides future teachers with elementary classroom experiences.

The students of Beiriger School are very involved with the community through participation in school and out-of-school activities that nurture the relationship between school and community. A very active student council coordinates numerous activities throughout the year such as raising money and collecting for emergency relief. The Parent Teacher Council (P.T.C.) holds annual fundraisers and donates proceeds to "Shop With a Cop" and other local charities. In addition, the school is a host meeting site for many community activities.

The school population can be seen as stable with a transient rate of less than five percent. Beiriger Elementary School has been recognized as a Four-Star school on three occasions with the last distinction being bestowed in 2004 and has received eleven state school improvement awards since 1989. In recent surveys, the stakeholders at Beiriger Elementary School overwhelmingly see their school as a safe, open, nurturing environment with strong leadership and effective communication. Beiriger students view the teaching staff as supportive, helpful, and clear in their expectations for student learning. In addition, the instructional staff views their workplace as a welcoming and cohesive environment with high expectations. Parents are active participants in their child's education. A high percentage of parents also attend Open House and volunteer for various school committees. PTC membership is high with over 100 of our families actively participating in projects.

The Beiriger Elementary School staff and the Northwest Indiana Special Education Cooperative (NISEC) address the needs of students with disabilities jointly. Beiriger provides facilities and staffing for children with moderate, severe/profound, and multiple disabilities for the districts of Griffith and Lake Ridge. Other special education services are provided for students with mild disabilities and speech/language disorders. These students are mainstreamed into the general education setting whenever it is appropriate. Thirty-nine percent of our students qualify for free/reduced lunch, therefore disqualify Beiriger for Title I services. Teacher directed programs are held before and after school offering assistance to students experiencing academic difficulties. Three instructional assistants prove intervention services to students who are identified at-risk based on STAR, Study Island, Fountas and Pinnell, and ISTEP+ scores.

Unique learning opportunities/programs are available to Beiriger students. Our school is a charter member of the Challenger Space Program, which is located at Purdue Calumet, Hammond, Indiana. These include sixth and third grade experiences at the Challenger Learning Center on the campus of Purdue University Calumet. This program allows students to actively experience higher-level thinking.
team-driven decision-making, higher-level problem solving, and the spirit of cooperative learning. Our fourth grade classes annually travel to Camp Tecumseh. Additional reading opportunities can be found in our "Book Worm Club". Parents, students, and teachers meet to discuss pieces of literature that have been read by each club member. The Scott Foresman science program allows all students hands-on science while engaging themselves in higher-level problem solving skills. An annual Science Olympiad, which involves many Beiriger students, enhances the understanding and interest in science. Sixth grade students may participate in an instrumental music class. Academic competitions, which are open to students in grades four through six, have become a part of the opportunities offered. Spell Bowl, Science Bowl, and Math Bowl competitions allow opportunities for students to compete on an academic level while learning team cohesiveness, sportsmanship, and responsibility. Our Spell Bowl and Math Bowl teams have consistently captured regional and state honors.

Beiriger Elementary School strives to offer learning opportunities for students that are unique, challenging, and enriching, through a variety of activities and methods. Students with high ability require different instructional strategies. They have unique talents and abilities. They need daily independent self-directed activities. There is a need for differentiation of their curriculum. We attempt to meet the needs of these students by cluster grouping whenever possible. Learning opportunities that challenge students to think at high levels, accelerate the pace and depth of curriculum, and creates opportunities to utilize new skills in problem solving situations are goals for our staff. Teachers design instructional strategies that allow these students to work together to problem solve and discuss.
School's Purpose

Provide the school's purpose statement and ancillary content such as mission, vision, values, and/or beliefs. Describe how the school embodies its purpose through its program offerings and expectations for students.

MISSION STATEMENT

The mission of Beiriger Elementary School is to be a student centered school. All students are provided with knowledge and life skills to become life long learners and College and career ready citizens.

Core Values

Respect

Responsibility

Resourcefulness

THE VISION OF BEIRIGER SCHOOL

- To develop our students into independent, lifelong learners who will become tomorrow's leaders.
- To know and articulate the academic outcomes we seek. These outcomes are prescribed through the State of Indiana and local expectations.
- To take deliberate steps to help students achieve these outcomes by making strategic adjustments in curriculum, teaching, and instructional strategies.
- To ensure that benchmarks for implementing strategies that have been set will be monitored and reviewed regularly for specific results based on the data.
- To address areas of concern. As a result, continuous change will enhance the culture of our school.
- To recognize the high quality of Beiriger School and commit ourselves to all stakeholders in maintaining this level of excellence.

* Students are provided with many educational opportunities such as: math and spell bowl, robotics club, and These programs offer higher-level thinking opportunities. High expectations and rigor to the programs are necessary.
Notable Achievements and Areas of Improvement

Describe the school's notable achievements and areas of improvement in the last three years. Additionally, describe areas for improvement that the school is striving to achieve in the next three years.

CURRICULUM AND ACADEMIC STANDARDS

The staff of Beiriger Elementary School optimizes the opportunities to align the curriculum with the Indiana Academic Standards and the Core Academic Standards by upgrading textbooks, enhancing the current curriculum, and shifting the goal of teaching from covering a variety of materials, skills, and information of teaching specifically for the mastery of standards.

A great emphasis has been placed on acquiring textbooks that meet all the new requirements. Our reading series, Reading Street, adopted in 2013, aligns highly with the Indiana Common Core Standards. Language Arts scores are reflective of this. The Pearson enVision 2.0 addresses the learning needs of our students while challenging them to develop and utilize uncommonly used problem-solving strategies. Teachers have diligently searched textbooks to find areas of deficiencies and are in the process of applying Best Practice strategies, creating support programs to address the specific needs of the learner, and aligning assessments to ensure all students will master the new standards of curriculum. We continue to be data driven and result focused. Our RTI program targets students that meet a criteria for additional support. RTI staff use researched based programs to ‘fill in the gaps’ of struggling students. RTI staff works with general education teachers to help all students at Beiriger Elementary. In addition to our data-driven approach to teaching, our data coach supports our staff by analyzing data and supplying teachers with training and information necessary to increase growth for each students.

INSTRUCTIONAL STRATEGIES/ACADEMIC STANDARDS

Beiriger's instructional strategies are changing to support the achievement of the Indiana State Standards and the Common Core Standards. Current strategies, such as Peer Tutoring, Instructional Assistant Services, and small group instruction will continue to reach a select group of students. However, data has shown there are many other students who need additional support. This knowledge has prompted the Beiriger staff to look into Best Practices to meet those needs. We are currently researching strategies and training for our staff to meet the needs of our diverse high ability and high achieving students.

The Pearson enVision 2.0 math textbook was adopted this year. A vast group of teachers carefully hand selected this textbook to meet the needs and deficits of our previous math series, Saxon Math. Our staff has received extensive training in the implementation of the series along with best practices to engage our struggling learners. This was coupled with a layered instructional model to help students develop stronger mathematical concepts.

In the area of Language Arts, we continue to work on writing improvement. Our adopted Language Arts program, Great Source, will support our efforts in reading and language. While grade levels are using rubrics for consistent grading, and prompts are now administered and graded regularly, we are starting to use the data in order to focus our instruction throughout the year. We will continue to focus attention in this area, consult with outside resources, and explore peer coaching to move us in a positive direction.
Parents, in accordance with the school handbook, are required to call into the office to report a child’s absence. A school health assistant contacts the homes of unconfirmed absentees daily. Reasons for absences are posted so teachers are fully aware of the circumstances. (This helps in gathering student work, etc.) Parent letters are sent after ten absences and five tardies. Classroom percentages are shared at P.T.C. meetings, morning announcements, and monthly newsletters. An attendance committee is reviewing options to improve attendance and tardies.
Provide any additional information you would like to share with the public and community that were not prompted in the previous sections.

STAFF AND CURRICULUM

Twenty-nine percent of the teaching staff at Beiriger have a Master’s degree. Staff members participate in continuing education coursework. The average number of years of teaching experience at Beiriger is 12.4. The ratio of certified administrators to teaching staff is 1:27. Ninety-seven percent of our teaching staff are qualified as effective or highly effective.

Professional growth is ongoing and obtained by individual staff members or grade level teachers attending curricular or instructional conferences. Focus continues to be dedicated to improving reading, writing, and math skills. Over sixty percent of our staff has been trained in 6+1 Writing Traits. One hundred percent of our staff has been trained in Differentiated Instruction.

Curriculum is ever changing at Beiriger School. It is established and focused around the core standards, state standards, and local expectations. Copies can be found in each classroom, main office, and school library. Those located in the library are available for parents to checkout. Standard booklets, as provided by the State of Indiana, are presented to and discussed with parents at Open House. Currently, Beiriger implemented the 8-step process which focuses on standard-based assessments, remediation on focused standards as well as enrichment for students who have gained mastery. By creating standard based assessments as well as following a district-wide curriculum map for ELA, Reading, and Math, we are able to identify students and best practice strategies, quickly and efficiently.

Within the School Improvement Plan, staff members will use technology to quickly assess student levels and search for remediation opportunities that can help struggling children obtain success. The computer based programs commonly called “STAR” and “Study Island” will allow staff to quickly determine the appropriate level of challenge for each child and identify those who continue to need individual help. Fountas and Pinnell, the reading leveling system, also gives teachers benchmarking data. This data allows teachers and RTI staff to target each child’s individual needs. As mentioned previously, our standard-based 8-step assessments are technology based and driven to replicate the online ISTEP testing experience.
Improvement Plan Stakeholder Involvement
Introduction

The responses should be brief, descriptive, and appropriate for the specific section. It is recommended that the responses are written offline and then transferred into the sections below.
Describe the process used to engage a variety of stakeholders in the development of the institution's improvement plan. Include information on how stakeholders were selected and informed of their roles, and how meetings were scheduled to accommodate them.

A stakeholder involvement team was created that included parents, teachers, and a principal. The parents and teachers volunteered to be part of this team. This team meets monthly and a variety of items are discussed such as, events, programs, the school improvement plan and the action plan.

Currently, Beiriger Elementary School is still in the process of expanding our stakeholder involvement team to include other staff members, students, business members, and community members. The members of this team will be selected using the needs of our students being their number one priority. This team will continue to meet on a monthly basis throughout the school year.

Describe the representations from stakeholder groups that participated in the development of the improvement plan and their responsibilities in this process.

Beiriger's leadership team is comprised of teachers, other staff members and the principal, work together to analyze data which drives the school improvement plan. The data used comes from AdvancED surveys, ISTEP+, IREAD-3, STAR assessments, Study Island, school visits, and committee meetings. Based on this data, the leadership team develops an action plan that follows the vision and mission of the school to do what is best for students in terms of classroom instruction, PBIS, RTI, and the emotional needs of our students.

The leadership team then presents the data the stakeholder involvement team.

The parent volunteers provide an a different outlook and perspective on how the plan impact the student body and school. Their suggestions are very important in helping the school meet its goals while helping shape the school improvement plan. In addition to collaborating with the leadership team, the parent volunteers are a voice for our school by communicating with the public about the steps Beiriger is taking to make positive changes. They also have the responsibility of helping the school gather outside resources that can improve programming for our students.

Explain how the final improvement plan was communicated to all stakeholders, and the method and frequency in which stakeholders receive information on its progress.

The final improvement plan is communicated to all stakeholders by meeting with the leadership team. Moving forward, monthly stakeholder involvement team meetings will be used to deliver updates on the school improvement plan and its progress. Upon its completion, the leadership team will do a presentation on the improvement plan as it has been done in the past.
Self Assessment
Introduction

AdvancED's Self Assessment (SA) diagnostic is based on the AdvancED Standards of Quality, which serves as the foundation of the accreditation and continuous improvement process. The SA is a valuable tool for collaboratively engaging staff members and stakeholders in purposeful, honest dialogue and reflection to assess the institution's adherence to the Standards, and guide its continuous improvement efforts. The SA includes the institution's self-ratings of and the evidence cited for each of the indicators, comments that explain the indicator's ratings and an overall narrative for each Standard. The results of the SA are reviewed by the External Review Team as one essential component of the preparation process for the institution's External Review.
Standard 1: Purpose and Direction

The school maintains and communicates a purpose and direction that commit to high expectations for learning as well as shared values and beliefs about teaching and learning.

Overall Rating: 2.0

| 1.1       | The school engages in a systematic, inclusive, and comprehensive process to review, revise, and communicate a school purpose for student success. | No process to review, revise, or communicate a school purpose exists. Stakeholders are rarely asked for input regarding the purpose of the school. | •Survey results  
•Examples of communications to stakeholders about the school's purpose (i.e. website, newsletters, annual report, student handbook)  
•Communication plan to stakeholders regarding the school's purpose  
•Minutes from meetings related to development of the school's purpose  
•Documentation or description of the process for creating the school's purpose including the role of stakeholders  
•Purpose statements - past and present  
•As an AdvancEd team, we meet regularly. We also communicate with the rest of staff, parents, and students. We have gathered many artifacts that support the work we have done or will do. We have a binder that is tabbed by standard with the artifacts. We will have that to present to the team when they visit our school. | Level 1 |
Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

As we worked on this as a team and scored our standards, we realized we had a lot of work ahead of us to make our school a success. Some of the strengths we noted for standard one are as follows: school leadership, implementation of continuous improvement, and equity education programs and learning experiences for all students that include achievement of learning, thinking, and life skills.

Areas for improvement, or opportunities, are as follows: process to revise and review school purpose, surveys to stakeholders for continual feedback and revision, and making our mission more prevalent throughout the building, website, and overall school environment.

Our staff/team worked on our opportunities throughout the year. The following evidence indicates this: school mission created and website...
like for surveys created.
### Standard 2: Governance and Leadership

The school operates under governance and leadership that promote and support student performance and school effectiveness.

**Overall Rating:** 3.0

Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

In response to standard 2, our areas of strengths are: weekly staff meetings/memos, school improvement plan, engagement of parents, students, and staff with our school's purpose and direction, weekly grade level meetings, and policies and practices that support the school's direction. The evidence we tagged for this standard is as follows: 2014/2015 student handbook, weekly memos, staff meetings, grade level meetings/notes, school improvement plan, and PTC meeting and notes.

In response to our areas of improvement/opportunities, we see a need in working on a current staff handbook and training of staff on school policies. Evidence we have started to collect and implement: 1999 staff handbook and additional professional development opportunities for a comprehensive writing curriculum and our new online math series.
The school's curriculum, instructional design, and assessment practices guide and ensure teacher effectiveness and student learning.

| The school engages families in meaningful ways in their children's education and keeps them informed of their children's learning progress. | Programs that engage families in meaningful ways in their children's education are designed, implemented, and evaluated. Families have multiple ways of staying informed of their children's learning progress. | • Survey results  
• Volunteer program with variety of options for participation  
• List of varied activities and communications modes with families, e.g., info portal, online, newsletters, parent centers, academic nights, open house, early release days  
• Calendar outlining when and how families are provided information on child's progress  
• Parental/family/caregiver involvement plan including activities, timeframes, and evaluation process | Level 4 |

#### Evidence
- • Survey results
- • Volunteer program with variety of options for participation
- • List of varied activities and communications modes with families, e.g., info portal, online, newsletters, parent centers, academic nights, open house, early release days
- • Calendar outlining when and how families are provided information on child's progress
- • Parental/family/caregiver involvement plan including activities, timeframes, and evaluation process

#### Response
- Our school has a very hard working and dedicated PTC. Our PTC has a webpage with upcoming events. Also, we communicate well with parents/community. We use one call system, webpage, newsletters, etc.

| Grading and reporting are based on clearly defined criteria that represent the attainment of content knowledge and skills and are consistent across grade levels and courses. | Most teachers use common grading and reporting policies, processes, and procedures based on criteria that represent each student's attainment of content knowledge and skills. These policies, processes, and procedures are implemented across grade levels and courses. Most stakeholders are aware of the policies, processes, and procedures. The policies, processes, and procedures may or may not be evaluated. | • Evaluation process for grading and reporting practices  
• Sample report cards for each grade level and for all courses  
• As a district we decided against standard based report cards. However, we need to work more on consistent grading within each grade level. | Level 2 |

#### Evidence
- • Evaluation process for grading and reporting practices
- • Sample report cards for each grade level and for all courses
- • As a district we decided against standard based report cards. However, we need to work more on consistent grading within each grade level.
## Reflect upon your responses to each of the indicators and performance levels by considering and responding to the following questions when drafting your narrative response. Use language from the performance level descriptions to guide your writing. Cite sources of evidence External Review team members may be interested in reviewing.

3.1 opportunities-teaching to multiple intelligence, common assessments across grade levels, and collaboration across grade levels

3.2 strengths-curriculum maps, success time, RTI, leveling, acuity, preferential seating, data wall, reteaching, and learning objectives posted.

3.2 opportunities-collaboration among grade levels and surveys to teachers/parents

3.3 strengths-data collecting, success/RTI time, technology, and cross-curricular activities

3.3 opportunities-more technology and teacher ‘buy in’

3.4 strengths-evaluations, classroom observations, weekly newsletters, teacher/staff recognition, one calls, and modeling of writing lessons

3.4 opportunities-time permitting meeting with grade levels weekly

3.5 strengths-grade level meeting minutes, monthly meeting calendar, and standard based report cards

3.5 opportunities-implementation of cross-curricular projects and a need for peer coaching

3.6 strengths-modeling teaching in classrooms, variety of assessments, updating and uploading grades weekly, listing daily learning objectives, and report cards and midterms

3.6 opportunity--the need for teachers to use an instructional process to inform students of learning expectations

3.7 strengths-curriculum map and record of meetings

We have many strengths for standard 4. Some of our strengths are as follows: number of personnel needed to fill roles and responsibilities are discussed, instructional time, material resources, and fiscal resources on supporting our school are discussed, school leader works to secure materials needed, and efforts for continuous improvement are supported. Improvements/Opportunities for standard four are: making sure instructional time is protected, working/communicating with central office to ensure policies, hiring, and fiscal procedures are followed, and ensuring that personnel has access to media and information resources for educational programs.

Student Performance Diagnostic
Introduction

The Student Performance Diagnostic provides an institution with a process to report summative student assessments. This diagnostic is significant to the accreditation and continuous improvement process as it serves as a resource for schools to view content area assessment results required by the state, district, or other entities, determine the quality and reliability of the given assessments, and show the alignment of the assessments to the school's curriculum. The performance level computed at the completion of the diagnostic is used by the external review team as a comprehensive report to understand fully the institution's assessment program; the diagnostic should be used in the same manner by the institution as it engages in improvement planning.

<tbody>
<tr>
<td>1. Assessment Quality</td>
<td>The array of assessment devices used by the institution to determine students' performances is sufficiently aligned so that valid inferences can be reached regarding students' status with respect to the entire set of curricular aims regarded as high-priority, &quot;must accomplish,&quot; instructional targets. The documentation provided in support of this alignment is persuasive. All of the assessments used are accompanied by evidence demonstrating that they satisfy accepted technical requirements such as validity, reliability, absence of bias, and instructional sensitivity.</td>
<td>Level 4</td>
</tr>
<tr>
<td>2. Test Administration</td>
<td>Most of the assessments used by the institution to determine students' performances have been administered with reasonable fidelity to the administrative procedures appropriate for each assessment. In most instances, the students to whom these assessments were administered are essentially representative of the students served by the institution. Appropriate accommodations have been provided for most assessments so that valid inferences can be made about most students' status with respect to most of the institution's targeted curricular outcomes.</td>
<td>Level 3</td>
</tr>
<tr>
<td>3. Quality of Learning</td>
<td>Evidence of student learning promoted by the institution is acceptably analyzed and presented with reasonable clarity. In comparison to institutions functioning in a similar educational context, students' status, improvement, and/or growth evidence indicates that the level of student learning is at or above what would otherwise be expected.</td>
<td>Level 3</td>
</tr>
<tr>
<td>4. Equity of Learning</td>
<td>Evidence of student learning indicates achievement gaps exist among subpopulations of students, and these achievement gaps have noticeably declined.</td>
<td>Level 3</td>

</table>
Areas of Notable Achievement

Which area(s) are above the expected levels of performance?

Our attendance rate during the 2015-2016 school year was above the state average.
Our school received an "B" rating.
All grade levels performed above the state average on the spring ISTEP+ in both mathematics and E/LA.

Describe the area(s) that show a positive trend in performance.

E/LA and mathematics ISTEP+ results show a positive trend in performance until 2015.

Which area(s) indicate the overall highest performance?

Both Math and E/LA scores in general show the high overall performance. Grade 6, compared to the other grades, showed consistently higher scores in ELA.

Which subgroup(s) show a trend toward increasing performance?

No subgroups in 2014-2015 showed an increasing trend in performance. We've identified our DNP students categories 1, 2, and 3 as our subgroup for 2015-2016. Our DNP students showed the most amount of growth toward increasing performance.

Between which subgroups is the achievement gap closing?

Our Did Not Pass subgroup showed the most amount of growth with the label of "moving up".

Which of the above reported findings are consistent with findings from other data sources?

We have been utilizing (STAR) Reading and Math consistently for the past 2 years. We were able to identify students consistently showing low growth.
Areas in Need of Improvement

Which area(s) are below the expected levels of performance?

In 2015, ISTEP+ scores overall increased in both E/LA and mathematics. There are no areas in E/LA and mathematics that are below the state levels of performance.

Describe the area(s) that show a negative trend in performance.

We noted, from 2015-2016, in grade 5 that there is a negative trend in regards to ELA performance. In grade 4 a negative trend has been identified in Math.

Which area(s) indicate the overall lowest performance?

Mathematics and English Language Arts 2015 ISTEP+ scores are exactly the same and are above the state average.

Which subgroup(s) show a trend toward decreasing performance?

Performance decreased between 4th and 5th grade in ELA, with an increase in scores again in 6th grade. We have also noted based on our 2016 ISTEP results that our high achieving/high ability students are showing decreased growth or performance.

Between which subgroups is the achievement gap becoming greater?

The achievement gap between 4th and 6th grade in ELA is growing. Students in 4th grade show good progress, with a drop in 5th grade, and then an increase again in 6th grade.

Which of the above reported findings are consistent with findings from other data sources?

Our current primary data source, STAR, promotes this observation.

Evaluative Criteria and Rubrics 3.25
Stakeholder Feedback Diagnostic
Introduction

The Stakeholder Feedback Diagnostic is designed to analyze the institution's survey results in terms of areas of achievement and areas that need improvement. Further, the diagnostic is essential to the accreditation and continuous improvement processes in that it provides the institution with a comprehensive view of the aggregate scores of the surveys administered, and the actual total of respondents for each survey type to derive a single score for this diagnostic. The performance level score computed at the completion of the diagnostic is used to broaden and enhance the external review team's understanding of the stakeholder's perceptions of the institution; the diagnostic should be used in the same manner by the institution as it engages in improvement planning.

</tbody>
</table>
Areas of Notable Achievement

Which area(s) indicate the overall highest level of satisfaction or approval?

STAFF SURVEY
High Score - Standard 4 - Resources and Support Systems
Our school maintains facilities that contribute to a safe environment: 78% Strongly Agree/Agree.
Our school provides qualified staff members to support student learning: 73% Strongly Agree/Agree.
Standard 5
65% Strongly Agree/Agree - our school uses multiple assessment measures - and - our school leaders monitor data.

PARENT SURVEY
Parents high scores
Our school provides a safe learning environment (60%).
Our school provides opportunities for students to participate in activities that interest them (69%).
Standard 3 - high score. My child has up-to-date computers and technology to learn (53%).

STUDENT: 6-12
Student high scores
Teachers and principals have high expectations (61%)
My school gives me multiple assessments to check my understanding (59%).
Purpose and expectations are clearly explained to me and my family (58%)
School programs and services are available to help me succeed (58%).

Which area(s) show a trend toward increasing stakeholder satisfaction or approval?

At the time the survey was conducted, Spring 2014, the teachers responded more positively to questions regarding "3.11 - All staff members participate in a continuous program of professional learning" and "3.5 - The system operates as a collaborative learning organization through structures that support improved instruction and student learning at all levels". In 2013, for the first time, we implemented a delayed start which gave us time to run Professional Learning Communities. This program was pulled for the 2013-14 school year. However, due to the responses from our staff survey, the program was redeveloped for the 2014-2015 school year.
As a result of new evaluation measures per state mandate, we saw an improvement in the staff survey regarding standard 2.6 - Leadership and staff supervision and evaluation processes result in improved professional practice in all areas of the system and improved student success.
The parent and student surveys stayed the same or decreased in every standard.

Which of the above reported findings are consistent with findings from other stakeholder feedback sources?

When the leadership team self-assessed last spring, they confirmed the improved satisfaction regarding collaboration and professional development. Due to our professional learning communities that take place every Tuesday morning, we have been able to effectively
implement a student-free time for educators to collaborate or participate in professional development.
Areas in Need of Improvement

Which area(s) indicate the overall lowest level of satisfaction or approval?

STAFF
Standard 2
Only 37% agree or strongly agree that "Our school's leaders engage effectively with all stakeholders about the school's purpose and direction"
Standard 5
Only 32% believe that our staff are trained in the evaluation, interpretation, and use of data.
Standard 3 - Lowest scores
Only 21% agreed that a formal process is in place to support new staff members.
47% believe that a structure exists where each student is well known by at least one adult advocate.
Only 38% of staff believe that "All teachers in our school have been trained to implement a formal process that promotes discussion about student learning (e.g., action research, examination of student work, reflection, study teams, and peer coaching)."

PARENTS
Parent survey scores were much lower than staff.
Only 23% agreed that my child's teachers keep me informed regularly of how my child is being graded.
Other areas where we scored low with parents:
All of my child's teachers meet his/her learning needs by individualizing instruction (31%).
My child has access to support services based on his/her needs (35%).
My child has teachers that monitor and inform me of his/her learning progress (26%).

STUDENT LOW SCORES
Student survey scores were much lower: Grades 6-12
Only 8% agreed that "In my school, students respect the property of others."
Only 17% "all students are treated with respect." 11% - treat adults with respect"
Students help each other even if they are not friends" (15%)
"My school makes sure there is at least one adult who knows me well." (34%).
160 students stated that they strongly disagree. Students in primary grades-
Only 41% agreed "In my school, students treat adults with respect." This is a low number compared to many standards where over 90% of the students agreed.
Only 43% agreed "My principal and teachers ask me what I think about school."

Which area(s) show a trend toward decreasing stakeholder satisfaction or approval?

When comparing the 2014 stakeholder feedback survey to the 2013 stakeholder feedback survey, the ratings were the same or lower for each standard for each group (parents, staff, students).
The greatest concern with students occurred in their concern for respect. They felt a great lack of respect between students and students.
and students toward adults. Parents showed a great concern for governance and leadership, lack of communication from teachers, and lack of differentiated teaching practices.

The staff showed concern for engaging teaching practices and a support of these practices.

What are the implications for these stakeholder perceptions?

With regards to students, we need to look at stronger character development programs where we teach kids the importance of and how to respect property, other students, and adults.

With parents, both leadership and classroom teachers need to improve communication skills. They need to be more involved in decision-making and more information needs to be shared with parents regarding the schools and their students.

With staff, we need to improve communication from the leadership and provide more training and professional development for best practices, particularly providing differentiated instruction, engaging instruction, and how to analyze and use data in the classroom. New staff members need a strong training and mentoring program to support them.

Which of the above reported findings are consistent with findings from other stakeholder feedback sources?

We conducted a staff professional development survey last spring. Since this was in the midst of our Professional Learning Communities, the staff felt that they had an opportunity to collaborative professional development. However, they expressed a concern and need for how to use and interpret data.

<td>To increase the percentage of students achieving a passing score on ELA portion of the ISTEP+ test.</td>
<td>Objectives:1, Strategies:1, Activities:1</td>
<td>Academic</td>
<td>$30000</td>
</tr>
</tbody>
</table>
Goal 1: To increase the percentage of students achieving a passing score on Math portions the ISTEP+ test.

Measurable Objective 1:
100% of Third, Fourth, Fifth and Sixth grade students will demonstrate a proficiency on the ISTEP+ test. in Mathematics by 05/13/2014 as measured by performance on the Spring 2014 math portion of the ISTEP+ test.

Strategy 1:
To increase the percentage of students achieving a passing score on Math portions the the ISTEP+ test. - The strategy will work by having all grades 3-6 teachers/RTI staff work on data collection, grouping, and assessment. Teachers will work as a team to group their students on particular skills taught in class. (enrich or reteach) This will be done 30 minutes daily targeting each child at each grade level. (success time) After skills have been taught, retaught, or enriched, teachers will give another assessment to see if the targeted time was effective.
Research Cited: The 8-step Model is a researched program supported by the IDOE.

</tbody>
</table>

Goal 2: To increase the percentage of students achieving a passing score on ELA portion of the ISTEP+ test.

Measurable Objective 1:
100% of Third, Fourth, Fifth and Sixth grade students will demonstrate a proficiency on the ISTEP+ test. in English Language Arts by 05/13/2014 as measured by performance on the Spring 2014 LA portion of the ISTEP+ test.

Strategy 1:
8-step Process - This strategy will work by targeting students on particular skills in LA. Teachers and RTI staff will collaborate based on student data and performance in class. Staff will use the 8-step process to build groups to either enrich or reteach based on prior skills taught and assessed. Students will get a 30 minute daily intervention based on their particular needs. Staff will meet weekly to re-look at assessments and groupings.
Research Cited: 8-step model researched and supported by the IDOE

**Total** $60000
Conclusion

The Indiana School Improvement Plan is designed to be comprehensive and for continuous improvement. Systemic use and consistent reflection are encouraged to update the status of the goals in order to make school improvement continuous and actionable.
