

**Pursuant to the requirements of the Asbestos Hazard Emergency Response Act (AHERA), inspection and management plans for the Griffith Public Schools were originally completed and submitted as of October 12, 1988. Asbestos Real Estate Consultants, Chicago, Illinois, conducted the inspections and developed the management plans. The firm also conducted awareness training for all custodial personnel.**

**The latest three-year re-inspection took place in August of 2012, by Amereco, Inc., Valparaiso, IN. The management plans are available upon request for inspection by contacting the Central Office and/or the specific building principal.**

**The findings of the original inspection and each re-inspection indicate that safe conditions exist in all buildings. Operations and maintenance programs will maintain and monitor our buildings continually to sustain this safety standard.**
